# About us

## The Spirit of Innovation

**Global Player.** COLOP is one of the world's leading manufacturers of modern stamp and marking devices. With more than 500 employees and numerous subsidiaries worldwide, COLOP exports to more than 130 countries with an export rate higher than 98 %. Continuous growth is firmly rooted in COLOP's corporate philosophy, which ensures that the globally increasing demand for high-quality European stamp products can continue to be met in the future. It was for this reason that a major expansion of the production capacity was carried out in the last few years at both the parent plant in Wels, Austria, and at the company's second production site in the Czech Republic. COLOP operates in two business areas: traditional stamps, and COLOP CREATIVE which includes digital marking and arts & crafts.

**Innovation & Design.** Since it was founded some 40 years ago, COLOP has been committed to product innovation in the field of state-of-the-art marking devices, particularly stamps. In 2008, for instance, the company introduced 'Green Stamps' into the stamp world. These stamps are made predominantly from recycled or renewable raw materials. Stamps with antibacterial protection are another of the company's significant innovations. With the Printer stamp line, the personalisation of stamps has become a trend. In 2019 COLOP introduced the world's first electronic-digital stamp and marking device for mobile printing of its kind - the COLOP e-mark®.

**Marking Solutions.** The range of products comprises a large selection of stamp solutions for different applications, including office and pocket stamps, text and date stamps, rectangular and round stamps. COLOP also supplies all the products and systems necessary to ensure a high-quality stamp imprint. The range of services offered by COLOP is rounded off by e-business solutions for the creation of text plates and the sale of stamp products online, as well as software tools for the personalisation of ImageCards™.

**Quality & environmental management.** COLOP's environmental management system has been ISO 14001 certified for many years, which ensures that all processes have been optimised from an ecological perspective. The company has however also had the conviction to make a voluntary, above-average contribution to environmental issues, going above and beyond the strict EU and national regulations. COLOP has been ISO 9001 certified since 2001. This certification forms the basis for a continual improvement process as part of the company's excellent internal quality management system.

**CO<sub>2</sub> reduced & compensated.** As early as during product development, attention is paid to resource conservation and the use of sustainable materials. The use of recycled plastics is constantly optimised and increased, and energy and raw materials are used as efficiently as possible. The in-house photo-voltaic system produces a considerable part of the electricity required at the Wels site. The significantly reduced but unavoidable CO<sub>2</sub> emissions of products - manufactured at one of the two production sites in Wels, Austria or Borovany, Czech Republic - are offset by investments in climate protection projects. This contains more than 90 % of all products in the COLOP range.

**High tech production.** A modern and efficient production process is of great importance to COLOP, paying special attention to the energy resources required. Fully automated production and manufacturing of key product lines, ongoing modernisation and upgrading of machinery and constant process optimisations all ensure high quality products and an energy-efficient manufacturing process.

# EOS Line

Especially for you

**The EOS Line is a modern and ergonomically designed flash stamp for brilliant and sharp imprints. Quick to manufacture and available „while you wait“ if required. The attractive black and white handles offer the perfect picture frame for your personal design.**

Included are three appealing ImageCard™ designs to choose from

Cover for protection and transportation

X-Large formats for oversize stamping

Easy and clean re-inking

Black EOS Standard and XL stamps are made of minimum 80% recycled plastics

**EOS ImageCard™ Designer**  
With the COLOP software you can easily personalise the look of your EOS stamp.

# Hybrid Dater

Unique combination of flash and self-inking technology

Combines the sturdy date functionality of a self-inking stamp with the flexibility and convenience of a flash stamp custom textplate.

Rubber date bands offer robust quality

Flash text plate can be made in a few minutes

Band cover for clean handling

Easy to change ink pads

# EOS Express

The fastest way to make a stamp

With the EOS Express cartridge stamps are produced within seconds. The assembling steps are minimised - no extra clear film needed. The optimised inking process makes the stamp ready to use in a few minutes. All black EOS Express mounts consist of at least 80% recycled plastic.

Pre-assembled EOS cartridge

Clear film already fixed on foam - easy handling and protection

Inking automatically activated during flash process

Final assembling with one click

# EOS Motivational Stamps

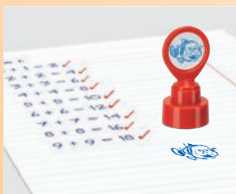

Motivate with an attractive stamp imprint

High quality stamps with positive, motivating messages - designed for target groups such as education or loyalty programs.

**Preinked** - Stamp is ready to use and requires no extra ink pad

**Re-inkable** - If imprint fades - pull off the handle and re-ink the stamp for further imprints

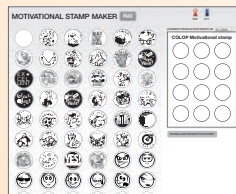

**Round image sticker** - Shows the imprint on the handle and helps to choose the right stamp

**High quality inks** - for brilliant and jolly imprints

**Easy handling** - A simple but ergonomical handle guarantees effortless stamping

**Practical storage** - The enclosed plastic box is perfect to keep the stamp ready and clean when not used

**Motivational Stamp Maker**  
Create your EOS production template quickly and easily with the COLOP online tool „Motivational Stamp Maker“. Many different designs are available. Each text can be modified to your language. [motivationalstamps.colop.com](http://motivationalstamps.colop.com)

# EOS Typesetting Tool

Typesetting with a few clicks

**The EOS Typesetting Tool contains everything the user will need to create textplates in minutes. It offers templates as well as the ability to upload photographs.**

Make stamps  
with your photo

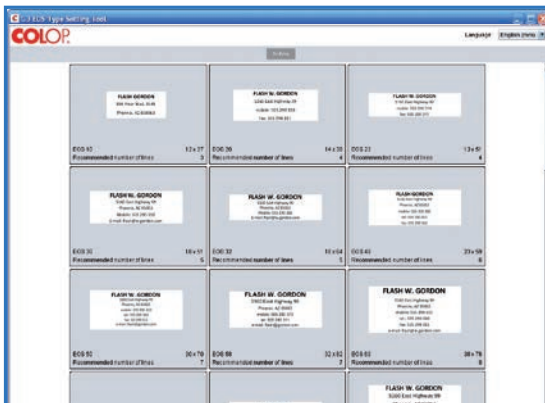

Includes templates  
for all EOS sizes

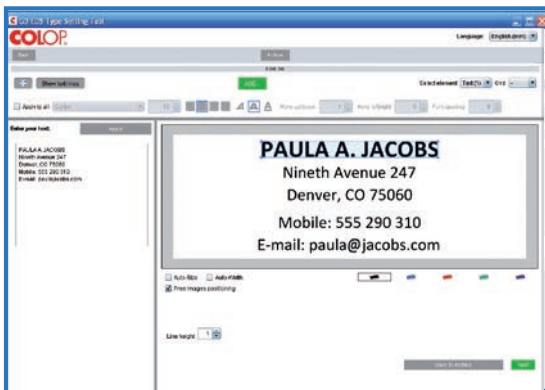

Download the software here:  
[eostst.colop.com](http://eostst.colop.com)

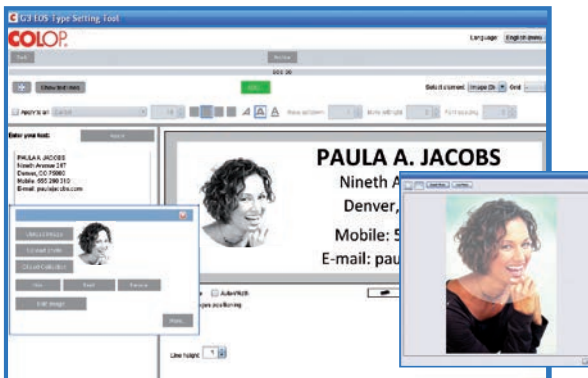

## 1. Choose size and template

Choose the desired EOS size and start either with a template or with a blank text plate.

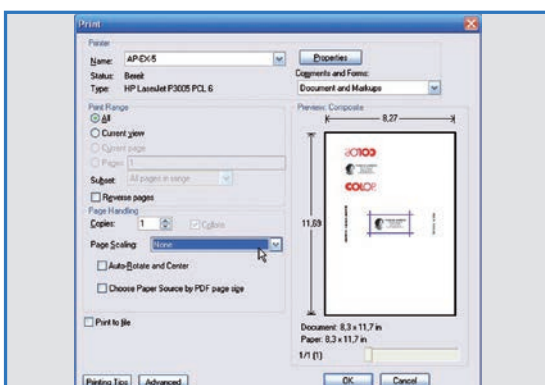

## 2. Typesetting

Enter the text and use the formatting controls to change the text style.

## 3. Add images or even photos

Choose images from the Clipart Collection or upload your own photo. It will be processed by a half-tone-filter to use it for a stamp.

## 4. Preview and print

Click on "view" to see the PDF preview and make sure that following settings are correct: Paper size DIN A4 (210 x 297 mm – also when using A6 vellum), no page scaling and no "auto-rotate and auto-center mode".
